

Location of ITEQ products

More than 60 full equipments (test benches + software) sold throughout Europe.
Several Ministries of Agriculture and official control bodies trust ITEQ products for their demonstrated accuracy, reliability and robustness.

France

Inspection of sprayers has become compulsory since 1st January 2009. The output nozzles measurement is only accepted (patternator measurements are refused).

Ten equipments have been sold and used on voluntary basis before enforcement of the law. As of today **49 full** equipments have been sold throughout France.

ITEQ offers quality and compliant products coupled with professional training and support. As a consequence ALL the ITEQ customers have been accredited by the GIP (official body coordinating the inspection of sprayers).

ITEQ is leader on the french market (they are 100 agreed inspection centers).

Belgium

Inspection of sprayers is mandatory since 1995. **Seven** equipments are used throughout Belgium by the Ministry of Agriculture.

More than 15000 sprayers have been inspected with each test bench since 1995!

ITEQ is now selling improved models of these equipments.

Poland

Two ITEQ equipments are used: University of Lublin and Ministry of Agriculture of Warsaw

Greece

One equipment is used by the Training Center of Larissa

Spain

Seven equipments in Spain: 1 at Universitat Politècnica de Catalonia in Barcelone, 1 at of Research Center – CMA at Lleida, 1 at Plant protection unit in Galice and 4 at DAP de Andalucia in Seville

Morocco

The Ministry of Agriculture has chosen ITEQ products to initiate inspection of sprayers. **Two** equipment are used (Rabbat and Agadir).
